

Effective January 1, 2010

Valued Customers,

In an effort to help everyone budget their operating costs and keep you informed regarding the institution of delivery surcharges in the future, we have adopted a simple scale based on the national average price of diesel fuel. Prices will be reviewed monthly and adjusted accordingly for the following month. Any surcharges, if applied, will be specified on your invoice.

Please note that S&S Tire charges no delivery surcharge when national average diesel fuel prices are below \$ 3.00 per gallon.

If you have questions, please contact your salesperson today! We appreciate your business and look forward to continually providing you the high service levels that you are accustomed to from S&S Tire!
